These innovative finds really work! From a unique face serum to a toothbrush that also whitens, they'll change your look and your life —we tested them all!

great for applying liquid and powder formulas!

1 Artís's ingenious makeup brushes

These tools don't just look cool—the unusual shapes have a purpose. The angular handles and flat brush heads make for way easier makeup application, and the densely packed bristles give just the right amount of color. Our tester also loved how well they blended her makeup.

CLINIQUE'S HIGH-TECH FACE SERUM

Great for all skin types, the formula works differently on everyone by pinpointing and treating your complexion's biggest issues—dryness, dark spots, fine lines, dullness and more. Our tester's dry skin felt significantly smoother and moisturized after trying it.

Emjoi's hair removal device

This compact epilator is so versatile. Great for legs, underarms and your bikini line, its 60 tweezer-like discs remove hair from the root as it glides over skin. While our tester warned it stings a bit, it's well worth it to stay fuzz-free for six weeks!
