# OPERATING INSTRUCTIONS

Your Avalon timepiece is fitted with the Sellita Cal. SW200-1 movement with date at 6 o'clock. The crown may be placed in 3 positions as per the image below.

- A. Fully pushed in – when in this position, the crown can be rotated clockwise to manually wind the movement.
- B. Partially pulled out – The middle crown position allows for the date to be adjusted by clockwise rotation.
- C. Fully pulled out – when in this position, the crown can be rotated in both directions to set the time.

## Notes:

1. The date requires manual advancement for months with less than 31 days.
2. Do not manually adjust the date during the automatic change-over action as this may damage the gearing in the mechanism.

## WARRANTY & SUPPORT

Your 2 year warranty covers material production defects concerning the watch, strap and movement. It does not cover damage caused through misuse/ physical force, or normal wear and tear.

If you have an issue with your timepiece, please ensure you contact our customer service team prior to attempting any course of repair on your own, as doing so will render your warranty void.

To lodge a support request, please email your details along with a description of the issue to [support@melbournewatch.com.au](mailto:support@melbournewatch.com.au)

This will create a support ticket within our helpdesk system and you will receive an automated email confirming receipt of your request, along with a case number which you can refer to during further correspondence.
